PROJECTED POPULATION IN 2010 The projected total resident population in 2010, as estimated by the Registrar General and published on 27 September 2007.

POPULATION DENSITY The sum of the number of residents per hectare for each Output Area (OA) within the area of the authority at the 2001 Census *multiplied by* that OA's share of the total usually resident population in the authority for each authority. This sum is then *multiplied by* the ratio of the total resident population at 30 June 2006 (as estimated by the Registrar General) to the 2001 Census resident population. This result is then *divided by* 10.

Output Areas were introduced by the Office for National Statistics as the smallest units of output for the 2001 census. In England and Wales they have a minimum size of 100 residents and 40 households. They are based on census day postcodes and fit within the boundaries of 2003 statistical wards (and parishes).

POPULATION SPARSITY The population sparsity of each local authority measured at Output Area level. The sum of:

- (i) 2 *multiplied by* the resident population of those Output Areas within the area of the authority at the 2001 Census with 0.5 or less residents per hectare, *divided by* the total resident population of the authority, calculated using information from the 2001 Census; and
- (ii) The resident population of those census Output Areas within the area of the authority at the 2001 Census with more than 0.5 but less than or equal to 4 residents per hectare, *divided by* the total resident population of the authority, calculated using information from the 2001 Census.

NET IN-COMMUTERS *Either the result of:*
The number of persons working but not resident in the authority's area *minus* the number of persons resident in but working outside the authority's area, as estimated by the Secretary of State using information from the 2001 Census;
or zero, whichever is the greater.

DAY VISITORS The annual number of day visitors to the authority's area, *divided by* 365, as estimated by the Secretary of State using information provided by the Secretary of State for Culture, Media and Sport.

The estimate for day visitors is based on research commissioned by the Department of National Heritage generally using information from the Leisure Day Visits Survey 1988-89, the 1991 Census, the 1991 Survey of Visits to Tourist Attractions undertaken by the National Tourist Boards, the 1991 Census of Employment and other information about urban areas, National Parks, areas of outstanding natural beauty and official bathing beaches. The information used for this purpose is that available to the Secretary of State for National Heritage on 1 November 1993.
